

Q. Write a program to draw “A” letter.

CODE

```
letter_A.php
File Edit View Close tab (Ctrl+W)

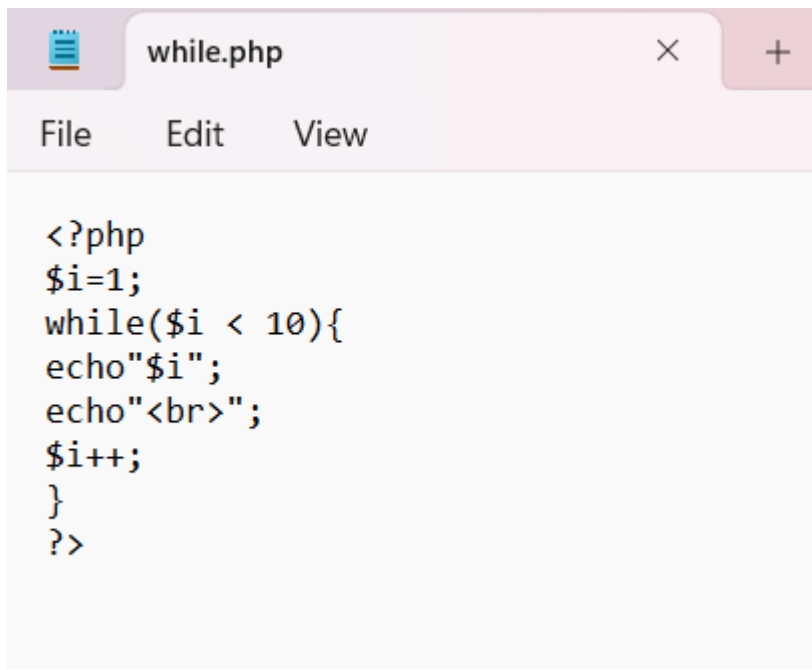

<?php
$im = imagecreate(200,200) or die("cannot initialize graphics");
imagecolorallocate($im,0,255,255,);
$line1 = imagecolorallocate($im,255,0,0);
$line2 = imagecolorallocate($im,255,0,0);
$line3 = imagecolorallocate($im,255,0,0);
imageline($im,90,50,10,200,$line1);
imageline($im,90,50,195,195,$line2);
imageline($im,50,120,140,120,$line3);
imagepng($im,"letter_A.png");
imagedestroy($im);
echo"<img src = letter_A.png>";
?>
```

OUTPUT

Q. Write a program for while loop.

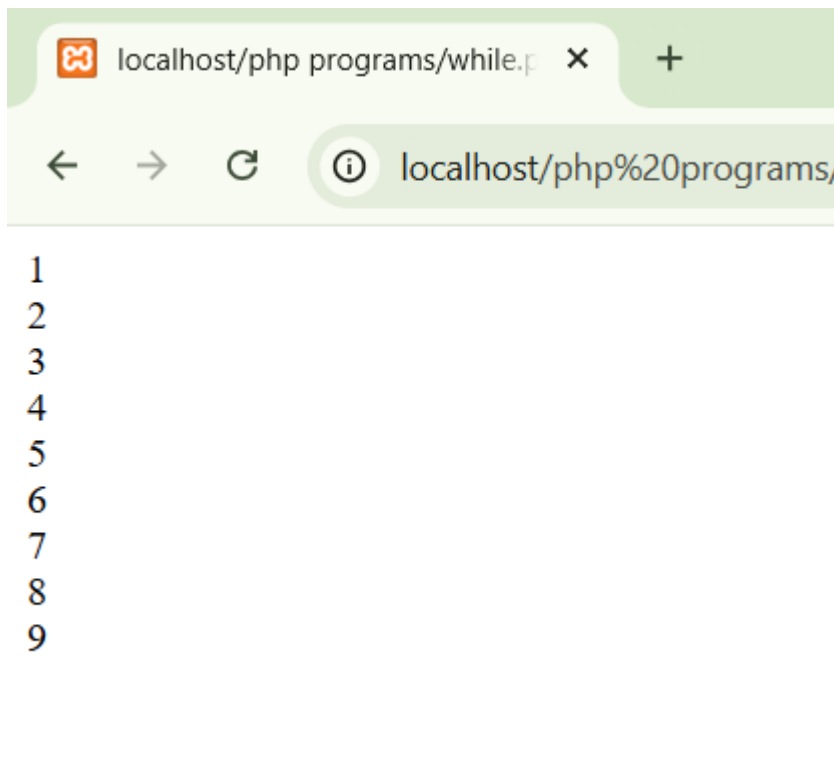

CODE

```
<?php
$i=1;
while($i < 10){
echo"$i";
echo"<br>";
$i++;
}
?>
```

The screenshot shows a code editor window titled 'while.php'. The editor contains a PHP script that uses a while loop to print numbers from 1 to 9, each on a new line. The code is as follows:

OUTPUT

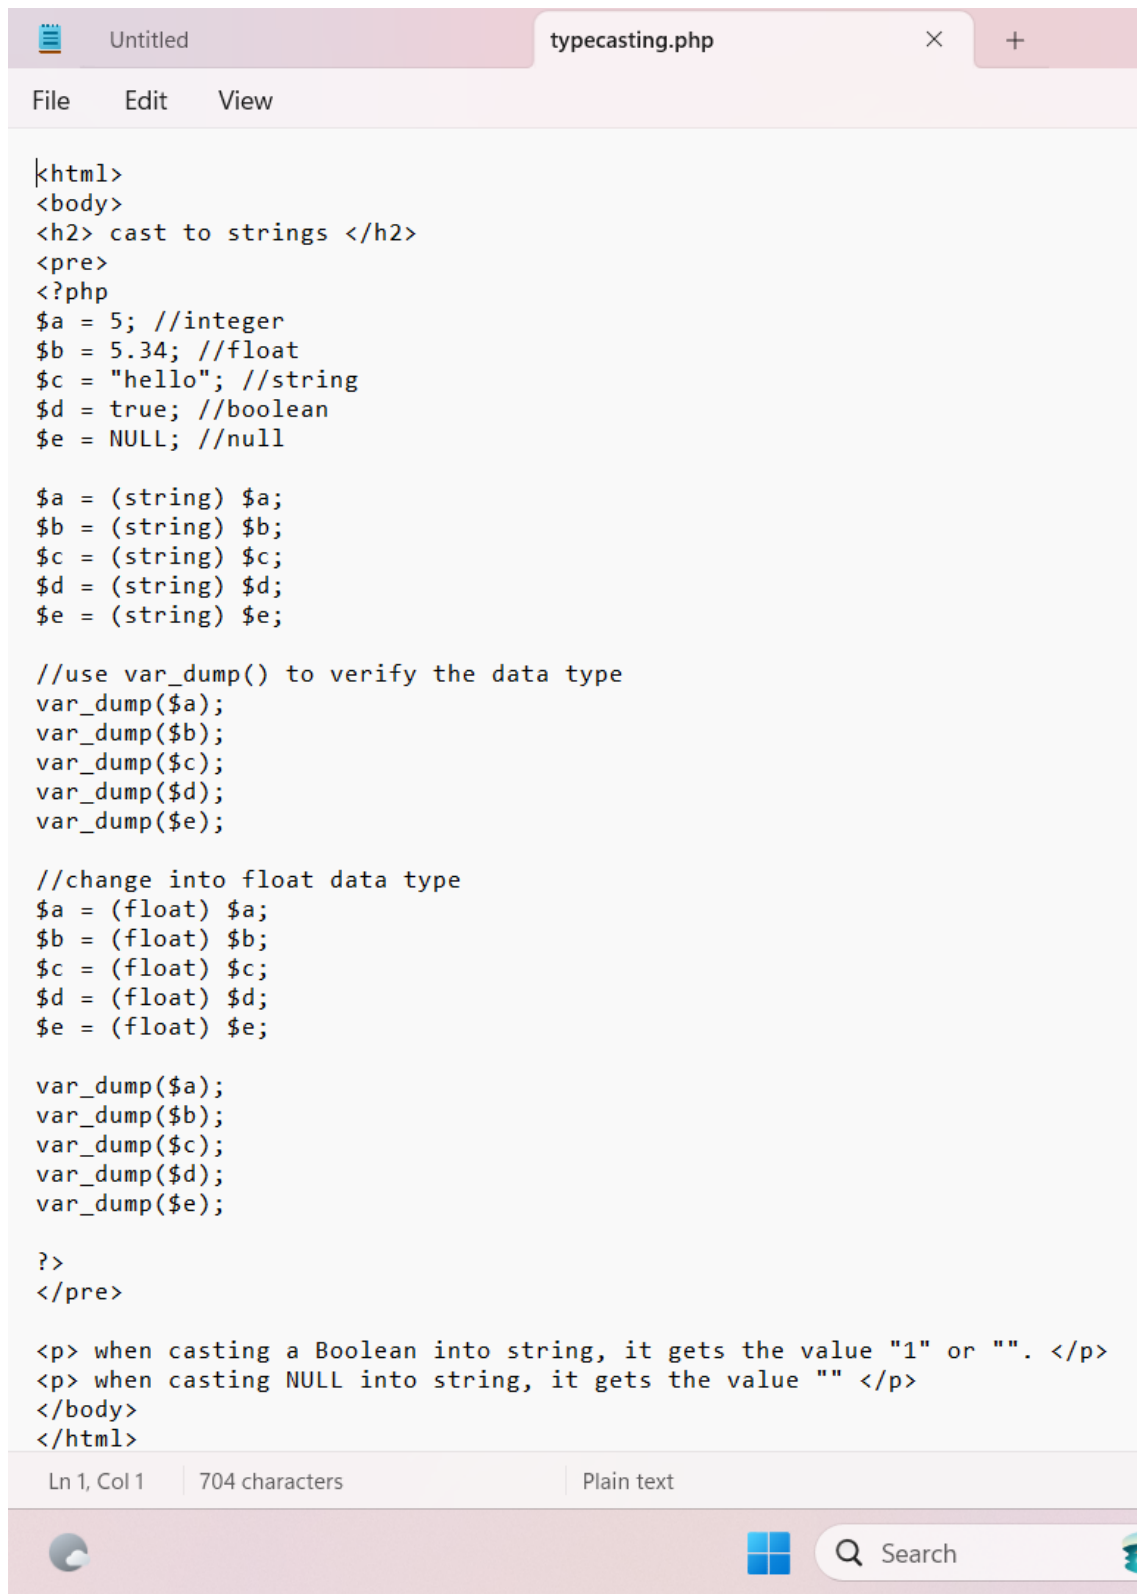

```
1
2
3
4
5
6
7
8
9
```

The screenshot shows a web browser window with the address bar displaying 'localhost/php programs/while.p'. The browser content area shows the output of the PHP program, which is the numbers 1 through 9, each on a new line.

Q. Write a program for type casting.

CODE

```

<html>
<body>
<h2> cast to strings </h2>
<pre>
<?php
$a = 5; //integer
$b = 5.34; //float
$c = "hello"; //string
$d = true; //boolean
$e = NULL; //null

$a = (string) $a;
$b = (string) $b;
$c = (string) $c;
$d = (string) $d;
$e = (string) $e;

//use var_dump() to verify the data type
var_dump($a);
var_dump($b);
var_dump($c);
var_dump($d);
var_dump($e);

//change into float data type
$a = (float) $a;
$b = (float) $b;
$c = (float) $c;
$d = (float) $d;
$e = (float) $e;

var_dump($a);
var_dump($b);
var_dump($c);
var_dump($d);
var_dump($e);

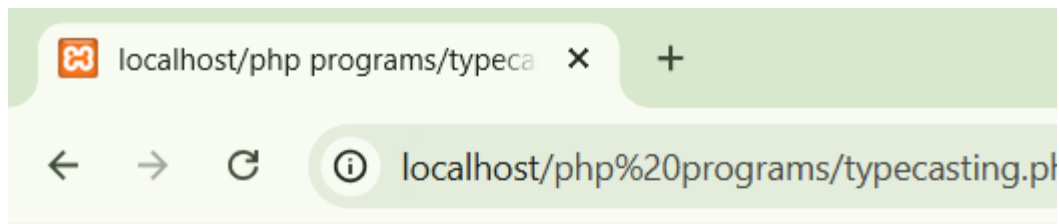

?>
</pre>

<p> when casting a Boolean into string, it gets the value "1" or "". </p>
<p> when casting NULL into string, it gets the value "" </p>
</body>
</html>

```

Ln 1, Col 1 | 704 characters | Plain text

OUTPUT

cast to strings

```
string(1) "5"  
string(4) "5.34"  
string(5) "hello"  
string(1) "1"  
string(0) ""  
float(5)  
float(5.34)  
float(0)  
float(1)  
float(0)
```

when casting a Boolean into string, it gets the value "1" or "".

when casting NULL into string, it gets the value ""

Q. Write a program for the connectivity of the database with form.

CODE

```
index.php × +
File Edit View

<form action="index.php" method="POST">
enter your first name
<input type="text" name="fname"><br><br>

enter your last name
<input type="text" name="lname"><br><br>

<input type="submit">
</form>

<?php
$servername = "localhost";
$username = "root";
$password = "";
$dbname = "student";

$conn = new mysqli($servername, $username, $password, $dbname);

if ($conn->connect_error) {
    die("connection fail");
}

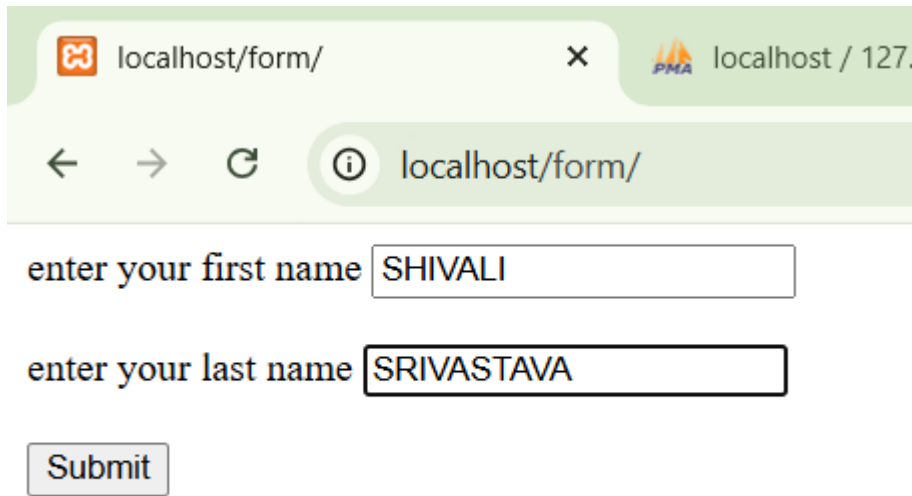

if ($_SERVER["REQUEST_METHOD"] == "POST") {
    $fname = $_POST['fname'];
    $lname = $_POST['lname'];

    $stmt = $conn->prepare("INSERT INTO data (fname, lname) VALUES (?, ?)");
    $stmt->bind_param("ss", $fname, $lname);

    if ($stmt->execute()) {
        echo "New record added";
    } else {
        echo "Error: " . $stmt->error;
    }
}

$conn->close();
?>
```

OUTPUT

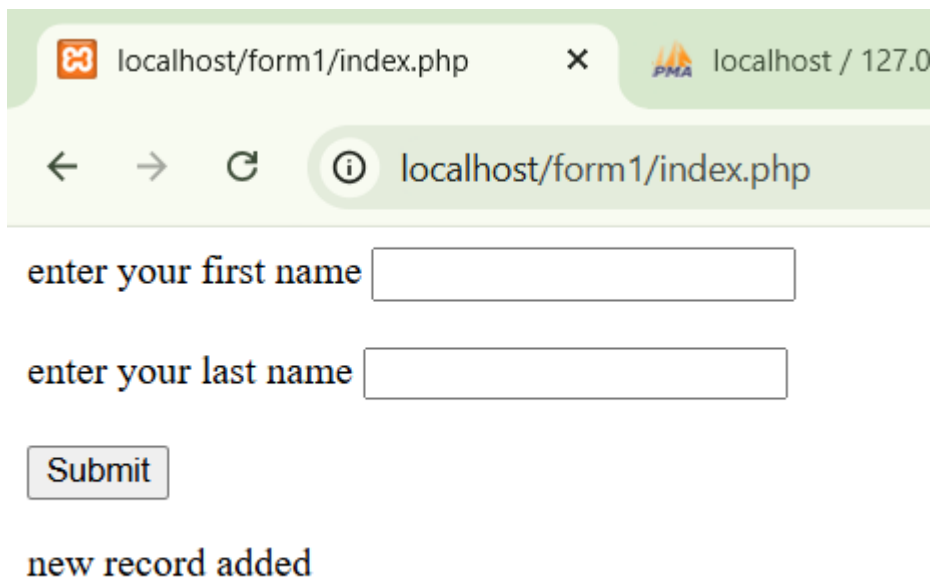

A screenshot of a web browser window. The address bar shows 'localhost/form/' with a green background. Below the address bar, there are navigation buttons (back, forward, refresh) and an information icon. The main content area contains two text input fields. The first field is labeled 'enter your first name' and contains the text 'SHIVALI'. The second field is labeled 'enter your last name' and contains the text 'SRIVASTAVA'. Below the input fields is a 'Submit' button.

localhost/form/

enter your first name SHIVALI

enter your last name SRIVASTAVA

Submit

A screenshot of a web browser window. The address bar shows 'localhost/form1/index.php' with a green background. Below the address bar, there are navigation buttons (back, forward, refresh) and an information icon. The main content area contains two text input fields. The first field is labeled 'enter your first name' and is empty. The second field is labeled 'enter your last name' and is empty. Below the input fields is a 'Submit' button. Below the 'Submit' button, the text 'new record added' is displayed.

localhost/form1/index.php

enter your first name

enter your last name

Submit

new record added

☐ Show all | Number of rows

Extra options

fname	lname
Anushka	Sahay
unnati	mehrotra
SHIVALI	SHRIVASTAVA

☐ Show all | Number of rows

New record is added in the database through database connectivity.
